Pick a class you teach…..any class….start with one thing that isn't working so well…..start with the "messiest"! There must be ***something*** you would like to improve. Then answer the following questions:

Instructor Name: **Semester/Year:**

Course:

- What is it you wish to improve? (What are students not learning as well as they should?)

- How do you plan to improve it? (Different teaching approach, visual aids, discussing strategy with colleagues from other schools who teach the same course, change the curriculum, change the delivery, spend more time preparing, etc.)

- What resources (if any) will you need to implement this?

- How will you determine if what you changed worked? (Higher scores on a specific test or test question, student feedback, improved grades on paper/project, etc.)
